EXHIBITOR'S NAME.....

Using the guidelines shown below please consider what a risk there is to those building up trade and autojumble stands and to members of the public during the show. Outline the steps you propose to take to minimise that risk in the table below. If in your opinion there is no risk please print **NO RISK** and return the form.

HAZARD	WHO MIGHT BE HARMED	IS MORE CONTROL NEEDED TO	
HAZAND	WHO MIGHT BE HARMED	CONTROL THE RISK	
Look for hazards which you could reason- ably expect to result in significant harm under the conditions at your plot. Use the following examples as a guide.	There is no need to list individuals by name - just think about groups of people doing similar work or who may be affected e.g	For hazards the hazards listed, do the precautions already taken	
Slipping/tripping hazards	Maintenance personnel	Meet the standards set by legal requirements?	
Chemicals (e.g battery acid)	Contractors	Comply with a recognised industry standards?	
Moving parts of machinery (e.g blades)	People sharing your work place	Represent good practice?	
Work at height (e.g from mezzanine floors)	Operators	Reduce risk as far as reasonably practicable?	
Pressure systems	Cleaners	To ensure safety have you:	
Vehicles (e.g fork-lift trucks)	Members of the public	Adequate information, instruction or training?	
Electricity	Pay particular attention to:	Adequate systems or procedures?	
Dust (e.g from grinding) Manual handling	Staff with disabilities Visitors	If so, then the risks are adequately controlled, but you need to indicate the precautions you have in place.	
Noise Lifting operation	Inexperienced staff Lone workers - They may be more vulnerable	Where the risk is not adequately controlled indicate what more you need to do (the 'action list')	
Fire Hazard e.g combustible materials (rubbish, flammable substances, LPG etc) and ignition sources (flames, smoking etc)	As above	Means of escape: fire detection and alarms. Fire fighting equipment and fire evacuation plan.
